

PRODUCT INFORMATION

INDUSTRIAL BOTTLE JACK - 20,000KG

This powerful, heavy-duty Borum Industrial Hydraulic Bottle Jack with high quality glide-action pressure pump is designed for hard-hitting commercial use, making large loads easy to lift. The lightweight jack is ideal for lifting farm vehicles, heavy-duty machinery, industrial construction equipment and more. High quality, fitted with unique overload protection system and large stable base, this unit is ideal for daily use in a demanding environment.

Fitted with a safety overload valve for extra protection, the safety valve is installed between the pump and high-pressure check valve in the barrel/lift ram assembly. When attempting to raise a load greater than the jack's capacity, the safety valve opens on each pump stroke and diverts any further oil back to the reservoir thus preventing the raising of the load.

The Borum BR02 series Bottle Jacks can be used horizontally when the pump is positioned above the ram housing or lying on their side with the pump positioned as per the illustrations below. Refer to the owners manual for more information.

BORUM
INDUSTRIAL WORKSHOP EQUIPMENT

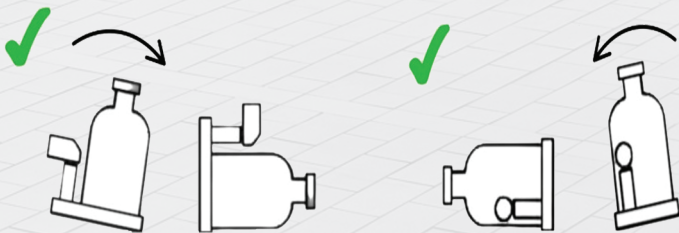

Features

- Machined and polished cylinders with die-cut threads provide non-abrasive leak-free, durable performance.
- Fabricated from hard-cast steel with heat-treated critical stress areas.
- Specially designed internal hydraulics allow the jack to be operated vertically & horizontally.
- Unique cross-type forged release valve assures positive load control.
- Overload protection built into the hydraulic system ensures user safety.
- 3-piece galvanised steel handle allows for easy & compact storage.

**INDUSTRIAL
QUALITY**

Specifications

- Safe Working Capacity: 20,000kg
- Minimum Height: 270mm
- Maximum Height: 420mm
- Handle: 3-piece galvanised steel
- Carton: 231L x 182W x 294H mm
- Gross Weight: 12.6kg
